

25 years experience

GOKSER has more than 25 years experience on the climatisation of the environments such as mushroom growing farms and composting farms. The company has also proven its quality not only for private sector but also for defence sector with the other products..

GOKSER realised many Research and Development Projects since its establishment. The R&D projects have been supported by the Scientific and Technological Research Council of Turkey (TUBITAK) and European Commission.

One of the R&D Project related with compost areas are Novel On Line Composting Monitoring System namely as "COMPO-BALL" which has been financed by the European Commission's 7th Framework Programme.

COMPO-BALL is developing a new system for monitoring the temperature and humidity during composting processes. The Project is 3-year research project and brings together 16 partners from 9 European countries. The aim is to bring affordable wireless composting-sensors to the European composting industry.
